- Sept. 2: Executive committee meeting - different day, different place,
4427-5th Ave. N.E. - ~~Michie's~~ PFLUM'S
- Sept. 6-7: Cave Ridge
- Sept. 13-14: Lava tube trip
- Sept. 22: Regular meeting as above, one week late.

The Cascade Caver
1117 - 36th Ave. E.
Seattle, Washington

^{11th 1969}
FIELD TRIP REPORT: PARADISE ICE CAVES

On Moon Monday, Charley Anderson and I had a look at the Paradise Ice Caves system. The Water Passage was still snowed shut. A ferocious blast of chill air was emerging from a narrow tunnel leading into the Pillar Passage; the orifice of the Big Room section was larger. The Great Pillar was largely shrouded by snow. A larval grylloblattid was found on the wall opposite the Pillar. Charley discovered a crawlway leading off a very pretty domed side-chamber off the Big Room that looked as if it was going to lead to the Pillar Passage, but did not; it trifurcated at a point which must be close to the headwall.

Plenty of tourists showed up by mid-afternoon, mostly amused by our clown-white. Worth a few snickers, though; not a trace of sunburn.

Bill Halliday
