## FIELD TRIP REPORTS

At the January meeting, Charley Anderson and Mark Vining reported that on December 23, the middle cave at Big Four had two large pillars, about 50 feet apart, each some 15 to 20 feet high. One was about 9 feet in diameter, the other 4 feet thick. Moulins were present in the west cave.

On the New Year's Eve weekend, despite Charley Larson's party, they also got some excellent photos in Ice Cave, Skamania County. Looks like a mild, low-snow winter.
