Grotto Notes

At the October meeting, the grotto accepted the resignation of Leonard Hargiss as grotto editor; he is moving to New Jersey. Also it was decided to terminate The Informer. The grotto is looking for a new editor for the Cascade Caver. Any volunteers? There is a large backlog of material for catch-up issues. Lots of slides at the October meeting from Windy Creek to Czechoslovakia, with especially notable ones by Fred Dickey. Evidently the Forest Service received a lot of adverse comments on the Mount St. Helens Draft EIS etc. and felt it had to make some changes for the caves area but still more changes are needed.
